Daily supplementary feeding with Rice Bran: Oil cake in the ratio 1:1 or formulated feed @ 2.5% of gross body weight, chopped grass banana/ tapioca leaves as feed for grass carp.
January- Mid March	Liming, supplementary feeding, manuring, test netting, water quality management, fish health management/ monitoring , maintaining water depth of at least 1.25 meter during lean period, fish health management/ monitoring and control of algal bloom & final harvesting & disposal.	Daily supplementary feeding with Rice Bran: Oil cake in the ratio 1:1 or formulated feed @ 2.0% of gross body weight, chopped grass banana/tapioca leaves as feed for grass carp.

ANNUAL ACTIVITIES CALENDAR OF FISH FARMING

‘Fish culture is a round the year activity. For effective management and better production farmer has to undertake different activities at different season/month based on climatic features to help the fish farmers. Annual work calendar for Carp Culture is prepared and farmers may use it for generating high profit and will enable fish farmers to adopt right activities at right time.’

Calendar is not absolute and can be modified suitably by the farmers at their own level.

For details/assistance contact your nearest Fishery field functionary/ DFDO or the Directorate of Fisheries Itanagar.
